10 February 1966

MEMORANDUM FOR: Mr. Bross

SUBJECT : Topics for Consideration (PFIAB)

1. A possible suggestion for discussions with Mr. [ ] might be the requirements of non-USIB agencies of the government for intelligence. (This is an extension of [ ] point on feedback.) Have personnel responsible for policy of some of these agencies or groups vitally involved in foreign affairs given sufficient thought or even been sufficiently briefed to express their possible needs from the intelligence community? As examples Agriculture, Commerce [ ]

[ ] come to mind. There are community relationships with Agriculture and Commerce, but aren't most of them concerned with our procuring their analytical or administrative help? And isn't this at the analytical and not policy making level?

2. Another area for discussion might be the extent of U.S. interests in individual countries and how it might be measured. Some time ago I heard that some group, State was involved, was to survey the extent of economic and military investments we had or intended to have in various countries. I don't know what has become of it, but it seems to me that this could be a starting point for measuring intelligence interests and refining DCID's 1/2 and 1/3 and that PFIAB could be helpful in ensuring the study would be completed.
